**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on 08 March 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Moore (US 4,741,868). Moore is considered to disclose the claimed invention comprising:

a liquid splash and scatter preventing equipment **42** provided in a horizontal above a neighborhood of a liquid concentration section between drums **20** and having a cooling function **45**.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moore in view of Rooney et al. (US 4,741,868). Moore is considered to disclose the claimed invention, as rejected above, except for the claimed cavity for feeding of a cooling liquid refrigerant. Rooney, another drum dryer, is considered to disclose a cavity for feeding of a cooling liquid refrigerant at column 5 lines 5-68. It would have been obvious to one skilled in the art to combine the teachings of Moore with the cavity for feeding of a cooling liquid refrigerant, considered disclosed by Rooney for the purpose of allowing cooling heat exchange in a vacuum drying process.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moore in view of Thal (US 2,087,788). Moore is considered to disclose the claimed invention, as rejected above, except for the claimed hollow metal for feeding of cooling water. Thal, another drum dryer, is considered to disclose a hollow metal for feeding of cooling water at the right column of page 2 lines 10-42 and left column of page 4 lines 40-58. It would have been obvious to one skilled in the art to combine the teachings of Moore with the hollow metal for feeding of cooling water, considered disclosed by Thal for the purpose of cooling material before it dries in order to avoid wasted heat.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).
